

A BETTER WAY TO MANAGE YOUR PRINTERS AND COPIERS

YOUR PRINTING MADE EASY

SIMPLIFY YOUR PRINTING TO SUITE YOUR BUSINESS NEEDS

MANAGED PRINT SERVICES

Kubic are experts in delivering holistic, flexible and cost-effective Managed Print Service (MPS) to create an optimal print environment by managing all your business document, print, copy and scanning needs.

This means that we take care of equipment purchasing and finance, installation and training, consumables and toner supplies and ongoing service. Rather than dealing with multiple suppliers you only deal with us. That means one bill, one phone number to call and one supplier that knows your company and truly values your business.

Our guaranteed Total Cost of Output model bundles the purchase of equipment, consumables and service to a transparent, cost-effective package so that you know how much it costs to print each page.

And as your business needs change We offer you flexibility to change your arrangements, maintaining your efficiency.

DO YOU KNOW HOW MUCH YOU ARE SPENDING?

Many businesses have don't have a clear idea about how much they are printing or how many printers they have. You may have an existing printer that works fine, but if it's not designed for the job the running costs of paper and toner mean it isn't great value.

Similarly, it's difficult for businesses to get an overall view on how much paper they're using.

Printing costs account for between 1% and 3% of a business's expenditure. In cash terms, that means the average business prints off 1,100 pages per employee per year with the wrong devices could be costing a small fortune.

This is where Kubic can help, in providing a no-cost audit to show you how much your printing and copying costs you today and how to make it cost less.

WANT TO REDUCE YOUR CARBON FOOTPRINT? PRINT LESS

The world's carbon emissions are rising steadily as are Australia's emissions per capita.

What if your business could reduce its costs and its carbon footprint at the same time?

The good news is, while 'paperless' maybe an unachievable ideal, 'less paper' is not that hard a nut to crack. Reducing your print output is not only a far better environmental outcome than recycling, it's also a powerful way to reduce costs
