

Transparent LED Screen TV-PH391-TM

Description:

The screen, as transparent as glass, ensure the color richness of the dynamic picture and the detailed pixel pitch meanwhile. With the continuous development of the screen technology, the transparent screen emerges. Compared with the traditional LCD, the screen can bring users an unprecedented visual experience and a new experience. Because the transparent screen itself has the characteristics of screen and transparency, it can be applied to many occasions, such as urban landmark buildings, municipal buildings, airports, automobile 4S shops, hotels, banks, chain stores and other places. It can not only be used as a screen, but also replace transparent flat glass. It is mainly used in exhibitions and product screens. For example, it replaces shop window. With high permeability, it ensures the original lighting perspective function of the glass curtain wall. Besides, it is light in weight and takes up little space. Thanks to the transparency, it enables people feel that the advertisements float on the glass curtain wall, which has unique screen effect. It can be maintained indoor for convenience, quickness and safety. Without fan and air conditioner cooling, it saves more than 40% energy than traditional LED screen, which is energy-saving and environmental-protection.

Specifications:

| | |
|--|---|
| Pixel Pitch | Horizontal:3.9/vertical: 7.8 |
| Unit Pixel Hollowing Rate(%) | 55% |
| Pixel Density (Dot/m ²) | 32768 dots/m ² |
| Module Resolution | 256*64 (rotatable 90° screen) |
| screen Resolution | 256*128 (interlaced) / 256*64 (stretched) |
| Scanning Mode | 1/6 |
| Max Power Consumption(W/m ²) | 460 (all white) |
| Average Power(W/m ²) | 153 (animation) |
| Brightness (nits) | ≥1200/2200 (2020/1921LED) |
| Panel Size (mm) | 1000*500 (can be rotated 90° during installation) |
| Panel Weight(Kg) | ≤5.5kg |
| Module Voltage | DC4.5V±0.2V |
| Input Voltage | AC100~240V 50/60Hz wide voltage / 220V±10V |
| Power Supply | >%90 efficiency PFC wide voltage 100~240VAC / >%80 efficiency 220VAC DC4.5V 40A |
| Screen Refresh Rate | ≥1920Hz |
| screen Port | DVI/HDMI/DP/network cable |
| Working Temp | -10°C~40°C |
| Malfunction Dot Rate | <1/10000 (industry standard: <1/10000) |
| Full White Lifespan | >100000 hours |
| Panel Material | Aluminum profile + die casting |
| LED Lifespan | The theoretical maximum of 100,000 hours |
| Ghost and Caterpillar Removal Circuits | With |
| Pixel Composition | 1R1G1B |
| Source Driver IC | MBI5124/ICN2038 |
| Gray Class | 10-16bit |
| IP Protection Level | IP65 |
| LED Encapsulation | SMD2020/1921 |
