## SPECIALISED APPLICATIONS ROOFING

### CORRUGATED / GALVANIZED / IBR

#### 1 PREPARATION

1. Wash with GREENCOAT Greenwash
2. Rinse thoroughly
3. Leave to dry

#### 2 PRIMER

1 Coat **GREENCOAT METALTREAT** (Stop rust & primer). **METALTREAT** is formulated as a water-based, rust-block additive to act against corrosion. It is ideal for rusted metal surfaces and has excellent anti-corrosion and weathering resistant properties. The product is environmentally friendly and does not emit noxious fumes and odours during and after application. **METALTREAT** is heat, ultraviolet, and Creep resistant.

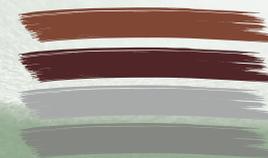

#### 3 2 COATS ROOF PAINT

**ECO-ROOF** - Top quality, 100% adhesion promoted pure acrylic roof coating. Highly recommended for surfaces where outstanding adhesion, alkali, water and weather resistance is required. Satin/ eggshell finish available in standard roof colours.
