GECKO® C.R.I.S.T.A.L.® Audiophile System for St. Stephen's Parish

Established in 1903, St. Stephen's Parish Church is the Episcopal Diocese of the Central Philippines' Pro-Cathedral serving Chinese communities located in Santa Cruz, Manila. Recently, the church upgraded to a full GECKO® sound reinforcement system for the large main sanctuary which comfortably seats up to a thousand parishioners.

The main reasons why GECKO® sound system was chosen are because of its capability to introduce intelligibility, even coverage, ease of setup and operation (in a minimalist design), in the existing hall acoustic. It is also a highly efficient system design with corrected power

factor and good signal-to-gain ratio which eliminates the feedback (howling) phenomenon without the need of a DSP suppressor.

Installed Sound Equipment

- 02 GECKO® REVELATION SR 615RF 15" 2-way full-range C.R.I.S.T.A.L.® long-throw speakers for F.O.H. (main sanctuary)
- 02 GECKO® REVELATION SR 606R 6.5" 2-way full-range C.R.I.S.T.A.L.® long-throw speakers for stereo fill (choir loft)
- 01 GECKO® GENESIS ELEGANCE AGE 900H C.R.I.S.T.A.L.® Class-H power amplifier
- 01 GECKO® PASSION MP 621W/RP 211U dual handheld wireless microphones system
- 01 GECKO® PASSION MP 741H/RP 211U dual headworn/body-pack wireless microphones system
- 01 GECKO® EXODUS ALPHA MXR 1800 18-channel C.R.I.S.T.A.L.® mixing console
- TRUTH T3AL signal cables
- TRUTH T2 speaker cables
- OLYMPIAN series connectors
- Aura series accessories

Daniel Foo from GECKO and Luisito Lim

"With this new design we are able to achieve clarity and even volume coverage throughout the sanctuary, from ground floor to the balcony. It makes our live mixing experience much simpler too," says Luisito, Senior Sound Tech of St. Stephen's Parish Church.
