**SECURCEN<sup>®</sup>**

THE FUTURE OF TRACEABILITY THROUGH RFID TECHNOLOGY

**SYSTEM PRESENTATION**

**Patented radio-control system for traceability of the bodies and their ashes in the crematorium.**

Ensures, throughout the process, a careful monitoring of the security procedures for:

- The acceptance of the funeral casket and its movement inside the crematorium for the ceremony.
- The cremation process (In all its steps).
- The collection of the remains of the cremation (In all the steps).
- Processing and preparation of cremation remains (In all the machines used).
- The delivery to the family of the ashes in the urn, even if stored at the crematorium waiting, for years.

**SECURCEN® It monitors each step, before and after the cremation process, uniquely checking and certifying the entire process.**

**SECURCEN® can be used in every crematorium. It is independent of the functionality of your ovens.**

**Some advantages in using the SECURCEN® radio-control system:**

- Identify each funeral casket or container, for indecomposites or other remains, entering your facility.
- Check the funeral casket or container in each movement in your crematorium, ascertaining its position.
- It includes the date, the start/end time of the cremation, the data of the deceased, before, during and after the procedure.
- It determines who the ashes belong to, in every single passage, up to the urn given to the family.
- At the end of the process, the data required for invoicing can be sent to the accounting department of the crematorium.
- It inhibits any "counterfeiting" of data or the "forcing" of the steps envisaged in your work plan.
- Adaptable to practically any methodology used at your facility.
- Control of the execution times of the various operations and of the assistant executing them.
- Fast, non-invasive installation of equipment in your normal activity.
- Redundant system of control, processing and storage of data locally and/or remotely.
- The machines used are certified and approved with industrial standards, in compliance with the C.E. regulations.
- Total respect for privacy, both for the crematorium staff, for the corpses, and their ashes and for the relatives of the deceased.
- Extreme ease, convenience and intuitiveness in the daily use of equipment by your staff.
- If you are interested in furthering the topic, contact our offices to arrange a meeting at your facility.

**EUROXWAY SRL** is a leader in the exclusive European supply of "customized" equipment specifically for crematoria, in full compliance with the various legal regulations existing in the EU.

**All the machines we sell are CE certified.**

Since 2007 our products have been installed in over 80 crematoria in France, England, Belgium, Italy, Poland, Scandinavia, Portugal, USA and are used with satisfaction by their managers, both public and private. The sale, installation and assistance is carried out, in the countries where we operate, with qualified and certified technicians.

SECURCEN® Software screens (In French language but available in all other languages)

The desktop screenshot shows the 'Gestion des processus' interface with a sidebar menu and a main content area. The main content area displays the 'Phases des processus' (Process Phases) section, which includes a table of process phases.

Phase	Obligatoire	Répétitif	Détail
ASSOCIATIONS RFID DOSSIER (3 RFID)	✓		✎
ARRIVE DU DEFUNT	✓		✎
DEPOT CERQUEILS			✎
DERNIER OMMAGE			✎
CREMATIONS	✓		✎
BROYAGES DES CENDRES	✓		✎
DEPOT TRANSITORIE URNE			✎
LIVRAISON URNE A LA FAMILLE	✓		✎

The mobile app screenshots show the following screens:

- ASSOCIATIONS RFID DOSSIER (3 RFID)**: Initial screen with 'ETAT DOSSIER' and 'AVANCEMENT' buttons.
- LIRE PREMIER RFID (SUPPORT PAPIER) EN ASSOCIATIONS AU DOSSIER**: Screen for reading the first RFID tag.
- LIRE SECOND RFID (SUPPORT EN PAPIER) EN ASSOCIATIONS AU DOSSIER**: Screen for reading the second RFID tag.
- LIRE TROISIEM RFID (SUPPORT FERRITE) EN ASSOCIATIONS AU DOSSIER**: Screen for reading the third RFID tag.
- ATTAQUER UN DES DEUX RFID (EN PAPIER) AU CERCUEIL**: Screen for attacking one of the two RFID tags on the coffin.
- ETAT DOSSIER AVANCEMENT**: Screen showing the progress of the dossier.

SECURCEN® - software screens - Detail of screens on the portable RFID reader for the beginning of the association with the deceased practice.  
The screenshots are in French for illustrative purposes only.

SECURCEN® software is also available in Italian, English and Spanish or in any other language necessary and functional to the country of installation.
