I was hoping for more discussions on companies that are truly green or doing sustainable practices. It wasn't until the end of the book that it has that. The first half of the book is dragged out and too much personal reflection, journaling, etc on values. Also disappointed on the lack of suggestions or ideas for an individual to be more sustainable. It was okay instead of dislike only because it did list some companies for me to research and got some other book ideas from it. View 1 comment. Feb 27, Caroline rated it did not like it.
