Threat Intelligence Maturity Evaluation (TIME)

Threat Intelligence – TIME to change the game

Organizations are under attack from increasingly complex threats to their environments. Adversaries employ a variety of attack tactics including cyber, physical, human and technology, often using a combination of these tactics. In order to get ahead of the game, businesses need to better their defenses in new ways and get ahead of potential threats and eliminate surprise. **That's where Center for Threat Intelligence's TIME come in.**

The TIME report includes:

- Executive summary
- Threat profiling specific to your organization
- Adversarial focus: Identifies level of sophisticated actors targeting your organization and strategies and tactics they use for their attacks
- Gap analysis for threat mitigation: Identifies current controls in place and potential gaps
- Threat Maturity Scorecard: Establishes a baseline of current threat intelligence capabilities
- Threat Map: Maps threats to targets and controls

Threat Profiling

Why do a Threat Intelligence Maturity Evaluation (TIME)?

- Determines where your organization stands in threat intelligence capabilities
- Identifies adversarial focus to assist enterprise risk management
- Helps prioritize threat intelligence capabilities based on your business objectives
- Establishes a foundation of threat intelligence capabilities in order to build proactive defensive measures
- Provides a baseline to establish next steps to fit into threat intelligence roadmap and strategy
- Demonstrates executive level due care

Threat Mapping

Scorecard
